

Anexando banco via SQL Lite

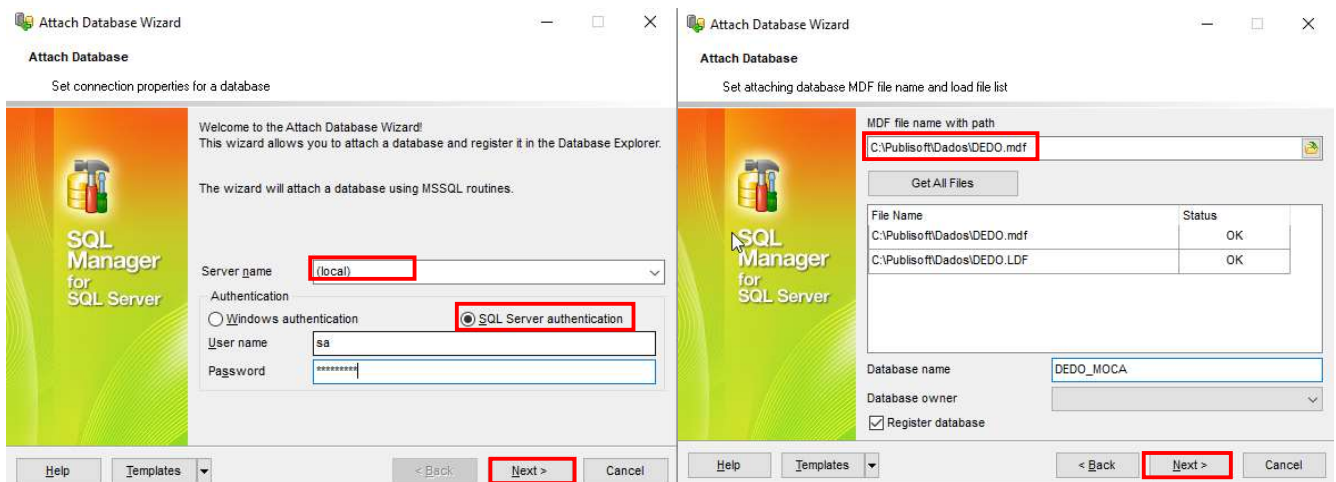

1. Acesse o SQL Lite

2. Em Services > Attach Database

3. Configure os dados de servidor e banco, selecione o arquivo mdf na pasta Dados da Publisoft e nomeie o banco

4. Certifique que o usuário “sa” está em inglês

The screenshot shows the SQL Server Enterprise Manager interface. On the left, the 'Server Objects' folder is expanded, and the 'Logins' folder is selected. The 'sa' login is highlighted. The 'General' tab is active, showing the 'sa' login name and the 'Default language' set to 'English'. The 'Options' section shows 'Enabled' checked and 'Locked out' unchecked. The 'Default database' is set to 'master'.
